

Charlotte shares her thoughts on the Trust wide Leading Active Learning Programme.

What areas of the school's work are you helping to develop through this programme and why did you choose it?

My project is focused on Maths in the Early Years, in particular looking at the outdoor environment. I chose the focus of this project to tie in with my interest in numeracy and to support our continuing efforts in Early Years to improve learning in the outdoor area.

What about the LAL programme do you enjoy the most?

I have really enjoyed meeting with and sharing best practice with a range of people from across the cluster. It has also given me the opportunity to interact with members of the ALT leadership team as part of the monthly cluster meetings.

What do you feel being part of the programme is making the difference to your work at the school?

As an NQT+1, Leading Active Learners has supported me further deepening my reflective practice. The cluster meetings have enabled me to consider different areas of teaching and learning across all stages. The programme has encouraged me to reflect on the leadership skills i am using on a day to day basis in my classroom as well as the skills i am developing as part of wider roles in school.
